This is a quiz program. The program allows you to answer up to 10 Java programming basic questions. Then it displays a report that shows all questions, their correct answers, answers selected by the user, and the number of correct answers.

## **Java programs: Quiz program**

A sequence of steps to achieve complete some work or obtain some result is called an algorithm. This is how programming is related to algorithms. Programming involves describing what you want the computer to do by a sequence of steps, by algorithms. Programmers are the people who create these instructions, which control computers. These instructions are called programs.

Python is an interpreted, high-level, general-purpose programming language. Created by Guido van Rossum and first released in 1991, Python has a design philosophy that emphasizes code readability, notably using significant whitespace. It provides constructs that enable clear programming on both small and large scales. Van Rossum led the language community until stepping down as leader in July 2018.
