The atherosclerotic process is not well understood. Atherosclerosis is associated with inflammatory processes in the endothelial cells of the vessel wall associated with retained low-density lipoprotein (LDL) particles. This retention may be a cause, an effect, or both, of the underlying inflammatory process.

INTRODUCTION. Cardiovascular diseases are among the main morbidity and mortality causes in the world. In Brazil, they are the main mortality cause, also due to the population's increased lifespan and the adoption of life habits with a higher exposure to risk factors (1).The cardiovascular diseases therapeutic approaches can be either clinic or surgical.
