Globalization and infectious diseases: A review of the

Infection is the invasion of an organism's body tissues by disease-causing agents, their multiplication, and the reaction of host tissues to the infectious agents and the toxins they produce. Infectious disease, also known as transmissible disease or communicable disease, is illness resulting from an infection.. Infections are caused by infectious agents including viruses, viroids, prions ...

Need of Biomedical Waste Management System in Hospitals

Bangladesh is one of the world's most vulnerable countries for climate change. This observational study examined the association of temperature, humidity and rainfall with six common climate-sensitive infectious diseases in adults (malaria, diarrheal disease, enteric fever, encephalitis, pneumonia and bacterial meningitis) in northeastern Bangladesh.

The association between temperature, rainfall and humidity

The Summary of Notifiable Infectious Diseases and Conditions – United States, 2015 (hereafter referred to as the summary) contains the official statistics, in tabular and graphical form, for the reported occurrence of nationally notifiable infectious diseases and conditions in the United States ...

Summary of Notifiable Infectious Diseases and Conditions

Therapeutic antibodies (ThAb) to infectious diseases are an important and emerging field. – Most ThAb that are licenced or in development are of the human IgG1 subclass.

Molecular properties of human IgG subclasses and their

Submitters sending specimens to CDC for laboratory testing should supply all pertinent information associated with the specimen(s). This information will allow the laboratory to effectively review the test order and perform the appropriate test(s).
