A review of concentrated solar power (CSP) plants operating in the US reveals that they are costly, heavily-subsidized, generally performing below expectations and no more efficient than utility-scale PV plants.

Concentrated solar power in the USA: a performance review

My view was always that a liquid as storage mechanism was more practical than a gas. In particular cells utilising developed Fischer-Tropsch to generate hydrocarbons from recycled plastics and solar holds out the hope of generating petrol to power ICE in cars as well as energy storage – allowing a smoother transition route to plug in hybrids as well.
