

evolutionary community ecology volume pdf

Evolutionary psychology is a theoretical approach in the social and natural sciences that examines psychological structure from a modern evolutionary perspective. It seeks to identify which human psychological traits are evolved adaptations – that is, the functional products of natural selection or sexual selection in human evolution. Adaptationist thinking about physiological mechanisms ...

Evolutionary game theory (EGT) is the application of game theory to evolving populations in biology. It defines a framework of contests, strategies, and analytics into which Darwinian competition can be modelled. It originated in 1973 with John Maynard Smith and George R. Price's formalisation of contests, analysed as strategies, and the mathematical criteria that can be used to predict the ...

Artificial selection is the selection of advantageous natural variation for human ends and is the mechanism by which most domestic species evolved. Most domesticates have their origin in one of a few historic centers of domestication as farm animals. Two notable exceptions are cats and dogs. Wolf ...

The intermediate disturbance hypothesis. Environmental conditions fluctuate on all temporal scales. Sometimes these fluctuations take the form of disturbances, relatively discrete events (ranging from footfalls to hurricanes) that harm the affected organisms.

The intermediate disturbance hypothesis should be

Psychosomatic Medicine, founded in 1939, is the official organ of the American Psychosomatic Society. It

publishes experimental and clinical studies dealing with various aspects of the relationships among social, psychological, and behavioral factors and bodily processes in humans and animals. It is an international, interdisciplinary journal devoted to experimental and clinical investigation ...
