I have a form where fields are pre-populated with values through an up-front process. I need to take values that exist in these fields and concatenate the values into a separate field so I can use that new field for a downstream process.

### **How to concatenate values from fields on a PDF | Adobe**

Recently someone referenced an old blog post: use data from one field to populate other fields in an acrobat fill-in forms and asked me how to concatenate multiple field values into one. So I put together a sample pdf. In this example I take four "Name" fields and use a script to update the contents of a 5th field with the previous four.
