Introduction. The fundamental theorem of calculus states that the integral of a function  $f$  over the interval  $[a, b]$  can be calculated by finding an antiderivative  $F$  of  $f$ :  $\int_a^b f(x) dx = F(b) - F(a)$ . Stokes' theorem is a vast generalization of this theorem in the following sense. By the choice of  $F$ ,  $dF/dx = f(x)$ . In the parlance of differential forms, this is saying that  $f(x) dx$  is the exterior derivative ...

Anti-Corruption: The Global Fight is a new handbook from IIP Publications that outlines the kinds of corruption, their effects, and the ways that people and governments combat corruption through legislative and civil society actions.

## **IIP Publications**

The incremental learning derives its name from the incremental nature of the learning process. In incremental learning, all facets of knowledge receive a regular treatment, and there is a regular inflow of new knowledge that builds upon the past knowledge.

## **SuperMemo: Incremental learning**

Alex, a lapse rate  $\sim -g/C_p$  is indeed very common, but it is NOT the "equilibrium" condition. Instead it is the typical "steady-state" condition when there is a heat flow up through a gas (which there is in every atmosphere of every planet and moon in the solar system).
