In physics, Liouville's theorem, named after the French mathematician Joseph Liouville, is a key theorem in classical statistical and Hamiltonian mechanics. It asserts that the phase-space distribution function is constant along the trajectories of the system—that is that the density of system points in the vicinity of a given system point traveling through phase-space is constant with time ...

A quantum vacuum thruster (QVT or Q-thruster) is a theoretical system that uses the same principles and equations of motion that a conventional plasma thruster would use, namely magnetohydrodynamics (MHD), to make predictions about the behavior of the propellant. However, rather than using a conventional plasma as a propellant, a QVT uses the quantum vacuum fluctuations of the zero-point field.

Caratteristiche generali. Il valore della carica elettrica e è uguale a quello dell'elettrone, ma di segno opposto ($1,602 \times 10^{-19}$ C). La massa a riposo m è pari a $1,6726231 \times 10^{-27}$ kg ($9,3828 \times 10^2$ MeV/c²), leggermente inferiore a quella del neutrone e circa 1836 volte superiore a quella dell'elettrone. È interessante notare che gran parte della massa del protone (come di quella del ...
