SUMMARY OF THE HIPAA PRIVACY RULE - HHS.gov

approach to privacy, it is important to understand the relationship and particularly the distinctions between information security and privacy. Doing so will improve understanding of how to apply established systems engineering and risk management processes to addressing privacy concerns.

An Introduction to Privacy Engineering and Risk Management

First, companies should build security into their devices at the outset, rather than as an afterthought. As part of the security by design process, companies should consider: (1) conducting a privacy or security risk assessment; (2) minimizing the data they collect and retain; and (3) testing their security measures before launching their products.
