Proposed Syllabus For B.Tech Program in Information Technology

1. INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ...

MANUALS - kandus.com

The Hwacha project is developing a new vector architecture for future computer systems that are constrained in their power and energy consumption. Inspired by traditional vector machines from the 70s and 80s, and lessons learned from our previous vector-thread architectures Scale and Maven, we are bringing back elegant, performant, and energy-efficient aspects of vector processing to modern ...

Most of the electronic circuits used in Circuitstoday.com have different applications of the transformer.

Therefore, it is important to know the working principle, construction and types of transformers used in different analog circuits.

Transformer Basics-Working principle,Construction,Types

This circuit is designed as per a request made by Mr Vinoth from India. His requirement was a 12V/5A DC fan motor controller. I think this circuit is sufficient for this purpose. Quad 2 input Schmitt trigger IC CD4093 is the heart of this circuit. Out of the four Schmitt triggers inside the 4093 ...

Website Builders. Coding a website can be daunting, especially without development experience. Whether you are new to website building or are a developer looking to save time, a user-friendly site builder will make your life simpler.

DEC & Digital Equipment Corporation: Where Did They Go

A simulation is an imitation of the operation of a real-world process or system. The act of simulating something first requires that a model be developed; this model represents the key characteristics, behaviors and functions of the selected physical or abstract system or process. The model represents the system itself, whereas the simulation represents the operation of the system over time.
